

A ROCHA

KENYA

AT A GLANCE

Nature conserved. People transformed.

Practical care for God's world

We are a Christian conservation organisation committed to practical biodiversity conservation through scientific research, environmental education and sustainable community-based conservation programmes.

We base our work on the recognition that the Bible clearly teaches about the importance of caring for the environment as God's creation.

The Bible speaks about God's love for his world and of our responsibility to look after it. Ours is a mandate to care for the earth. To use it, yes, but wisely and not to over-exploit, destroy or degrade it.

How we work

01

Understanding nature

We study species, habitats and ecological change. Bird ringing, wildlife surveys, habitat mapping and long-term monitoring help identify conservation priorities and measure change.

02

Conserve and restore

We secure threatened habitats and restore indigenous forests and coral reefs. Our work includes Dakatcha Nature Reserve, threatened-tree restoration, coral gardening and Crows No More.

03

Learn and act together

We work with schools, churches and communities through environmental education, ASSETS eco-bursaries, sustainable livelihoods and practical creation care.

Conservation in action

Selected figures from 2025, together with our partners

1,800+

People engaged in structured
Environmental learning

22,000+

Native trees planted in schools,
homes and other community spaces

32,600

Water birds counted at Mida Creek and
Sabaki

100,000+

Invasive House Crows controlled at the
Kenyan coast

Places worth caring for

From Arabuko-Sokoke and Dakatcha to Mida Creek and Watamu our work connects care for wildlife and habitats with the people living closest to them.

Our Christian faith calls us to care for creation.

Be part of the work

Your gift or partnership can help us sustain conservation, education and community action.

Give to support the work. Partner through your church, school, company or organisation. Volunteer your skills, or visit Mwamba, our field study centre in Watamu.
