

CONSERVATION PARTNERSHIPS

Support nature. Connect with the work.

Partner with A Rocha Kenya to support conservation along Kenya's coast and in Nairobi. Our Christian faith motivates practical care for creation through science, habitat protection, education and community action.

Your support can sustain our wider work or contribute to an agreed programme, from Dakatcha Nature Reserve and marine conservation to ASSETS eco-bursaries and environmental education.

LET'S TALK

Tell us what matters to your organisation. We can explore a partnership with a clear purpose, scope and next steps.

communications.kenya@arocha.org

1 SUPPORT THE WORK

Fund research, habitat protection, restoration or education. We can discuss a defined project or flexible support for the people and capacity behind the work

2 FOLLOW THE PROGRESS

Agree the objectives, reporting and review points at the outset, with updates on delivery, expenditure and what the work is showing

3 SHARE THE STORY

Explore field updates, photographs and stories that help your audiences understand the work they support. Content use and partner recognition are agreed together.

4 CONNECT YOUR PEOPLE

Discuss opportunities for staff, members or supporters to learn and take part through talks, visits or practical activities, according to programme capacity
